PDG Interoperability Committee – Review of Trace WG model v2.0.0

Differences between Tracing Model v1.1.0 and v2.0.0

The PDG membership approved these changes on August 6, 2025, which is when they became effective. The changes will be formally incorporated into the Blueprint on January 15, 2025.

Chapter 5 Changes:

1. Moved the TI Request and TI Response attribute documentation from Chapter 5 content to a separate Tracing Model document to simplify future attribute correction publications.

2. Created separate documentation for optional technical rendering of the Tracing Model (JSON schema, Excel template, PDF template).
